Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 17-20 to an invention and/or species non-elected without traverse. Accordingly, claims 17-20 have been cancelled.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: No reference was found anticipating or a combination of references found making obvious a contactor apparatus for contacting a plurality of semiconductor devices on a semiconductor wafer including a first contactor that contacts a first system of the semiconductor devices to supply power to the semiconductor devices and a second contactor for contacting a second system of the semiconductor devices to input and output signals to the second system wherein the second contactor is movable relative to the first system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comment

Claims 3-16 were previously withdrawn for being drawn to nonelected inventions and/or species. Because claims 3-16 are dependent on allowable claim 1 and contain all of the limitations thereof, claims 3-16 have been reinstated and are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leas et al is cited to show a power supplying contactor system and an input and output signal contactor system in a wafer test apparatus. The contactors do not have relative motion. Do et al is cited to show contactor systems with relative motion. The apparatus of Do et al does not supply power with one system of contactors.

Claims 1-16 are allowed.

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at telephone number 571-272-1961.
